

Botox – for less wrinkles and a more youthful appearance

The most frequently used aesthetic treatment in the world.

Botox is used for:

- reducing facial wrinkles (on the forehead, on the bridge of the nose, around the outer corners of the eyes, on the neck) caused by frowning, laughing, squinting, and even smoking;
- lifting mouth corners;
- lifting eyebrows.

How it works:

Botox is injected directly into the targeted facial muscles. It does not alter facial expressions. The result is a more youthful appearance.

When to have Botox:

When you want a more effective beauty treatment. The first effects are visible within 3 to 4 days and last 3 to 6 months.

Price:

For individual areas (forehead, wrinkles on the bridge of the nose, eyebrow lifting, crow's feet): EUR 250. Special promotional price EUR 200.

*The treatment is provided by
mag. sc. Amer Beharić, dr. med., spec. ophth., FEBO – ophthalmologist*

Contraindications: Neurological disorders of neuromuscular transmissions, problems with blood coagulation, certain surgeries that cause scarring, previous Botox treatments less than 3 months ago, pregnancy. All prices are in EUR and include VAT in accordance with the law. We reserve the right to change the prices.
