

A woman is lying on her back on a massage table, her head resting on a rolled-up white towel. She has a serene expression with her eyes closed. The background is a textured stone wall. To the left, there is a silver bowl of red grapes, a small glass bottle, and several bunches of lavender flowers. The overall atmosphere is calm and relaxing.

Anti OX tretma

Ideal for skin that is especially stressed by internal and external factors and is exposed to oxidative stress. The skin condition is characterised by signs of aging in the skin caused by oxidation. This includes lines, wrinkles and lack of firmness to elastosis, vessel damage and keratinisation. The complexion appears sallow, with skin showing signs of dehydration. Oxidative stress damages cells and leads to premature decomposition of collagen and other degenerative processes. Stimulating the skin's own repair mechanisms, combined with balancing moisture penetration and detox components, revitalises tissues with long-term effect.

The treatment includes: surface cleansing, scrub, circulation mask, microdermabrasion, moisturising massage, active ingredients, mask, finishing cream.

Global anti-aging

Ideal for skin in need of regeneration with moderate to distinct signs of aging skin. The skin condition is characterised by coarsened skin texture caused by age or light exposure, with wrinkles and lack of firmness to elastosis. The complexion appears dull and contours sag. Vessel damage may be visible. In the case of pronounced light-induced aging, the skin may appear rough to leathery. Degradation processes in the matrix, cell damage and prolonged cell turnover contribute to this decline in the skin. Stimulating the skin's own repair mechanisms in the epidermis and dermis smoothes the surface and builds up new skin volume from within.

The treatment includes: surface cleansing, scrub, circulation mask, microdermabrasion, ultrasound, concentrate, mask, and finishing cream.
